U.S. Patent and Trademark Office PTOL-37 (Rev. 1-04)

Allowable Subject Matter

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

Applicants(s) claimed invention is directed to a method of preparing a branched (co)polycarbonate resin the improvement comprising reacting at least one member selected from the group consisting of compounds of the formula 1a and /or 1b below:

The crux of the invention lies in the discovery that the polycarbonate obtained using either one or both of the two compounds above result in superior properties and flowability while having lower melt viscosities at both low and elevated shear rates than those previously obtained in the prior art. Such has neither been anticipated by nor made obvious from the prior art. The art of record demonstrates other highly branched polycarbonates produced in the art which are not, however, produced from or using either one or both of the compounds above.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly

Application/Control Number: 10/815,590
